# WIN CAREER READINESS SYSTEM

WIN Learning is on a mission to help all learners succeed

The personalized WIN Career Readiness System includes academic and employability skills courseware, career planning tools, and nationally recognized credentials as important foundational elements for creating a more effective and efficient system to prepare learners and job seekers for career and life success. Within the WIN Career Readiness System, foundational academic, interpersonal, and technological skills are learned within the context of careers to show learners the real-world value of these skills and prepare them for success in any occupation, no matter the industry.

Administrator Dashboard

Administrators and facilitators can view immediate learner progress from the Career Readiness System dashboard. The dashboard includes at-a-glance summary data on eBadges, certificates and credentials earned, total time spent in the courseware, and more.

Administrators can select a time stamp or period to manage and monitor progress for all courseware and credentials. The system allows for easy rollover, drill-down views and printable access to selected reports, all from a single streamlined dashboard.
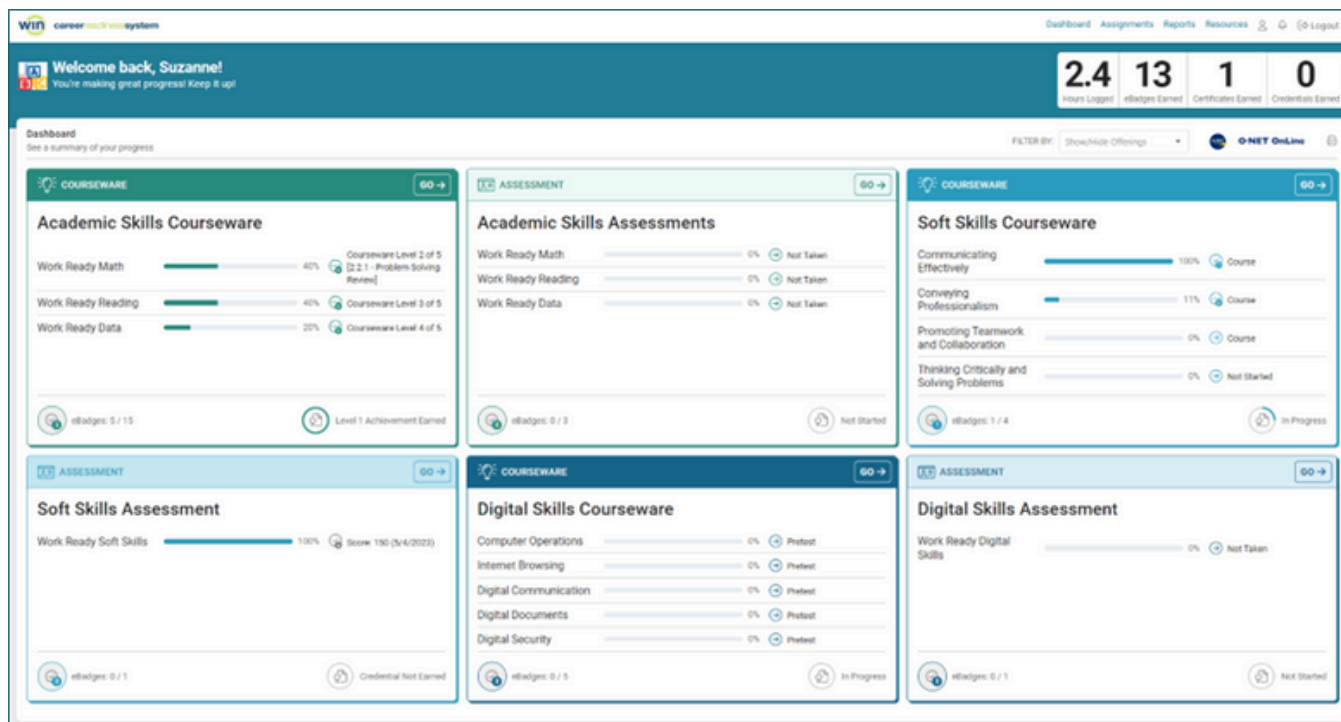

Learner Dashboard

When learners login to WIN CRSystem, they see tiles for each of their courseware and assessment solutions that display their progress, most recent scores, and how many eBadges they've earned. Counters at the top of the dashboard show the total number of hours they've logged in the system, and the number of eBadges, certificates, and credentials they've earned. Learners can filter their dashboard view to only display selected solutions. To launch a solution, learners click "Go" in the top right corner of the tile.

Learners can view their individual Activity Report by clicking "Reports" in the top right corner of the dashboard.

The Activity Report displays every solution the learner has access to. Learners can click to expand each solution and view their progress in the individual modules. They can view the level they have reached in each module, their level and scale scores, eBadges, and whether they have earned their certificate or credential.

Activity Report

Date Completed	Activity Start Time	Activity End Time	Session Time	Module	Content Type	Level	Level Score	Scale Score	eBadge	Credential	Certificate
