

WIN Learning is on a mission to ensure that all learners and job seekers have the skills to be successful in their careers.

RESEARCH-BASED

All of WIN's courseware and assessments were developed based on employer feedback and research conducted by the US Department of Education and the US Department of Labor, specifically the O*NET Content Model Framework.

WIN's solutions build the foundational skills required across all jobs and occupations, creating a common and shareable language between applicants and employers. Learners can access all WIN solutions in one place, including Soft Skills, Digital Skills, and Academic Skills Courseware and their corresponding assessments, as well as Supplemental Skills and College Readiness Courseware.

WIN consistently updates all courseware and assessments to keep pace with the evolving job market and employer needs.

All WIN credentials are endorsed by the National Work Readiness Council, a national nonprofit workforce development, training, and advocacy organization.

THE WIN DIFFERENCE

STACKABLE CREDENTIALS

Learners and job seekers can use any combination of WIN solutions to earn courseware Certificates of Completion and nationally-recognized credentials that can be added to their resume or portfolio and shared online.

24/7 ACCESS

The WIN Career Readiness System is available 24/7 for administrators and learners to access courseware and assessments from any computer.

SUPPORT & RESOURCES

WIN offers ongoing virtual and personal support to everyone in the system and has a full resource center online.
