# myStrategic Compass Career Exploration

## Career Planning for the Road Ahead

**Whether their path leads to the workplace, college, trade school, or military, WIN provides learners with the tools to prepare them for the road ahead.**

myStrategic Compass is designed for students and parents to help identify the careers that best suit learners' interests, skills, values, and goals. The interactive career planning program lets learners enter their individual preferences to find matching careers aligned to interest, skill, and work. Then, it provides important information about those careers such as the education and skill levels required and economic and labor forecasts. This helps learners understand the academic pathways required to get them to their career choice. By giving learners pertinent real-world information, they remain engaged and motivated through graduation and beyond.

### **Career Planning and Exploration**

myStrategic Compass includes a personalized electronic counseling tool with career interest profilers that examine what is important to a professional in each career. By comparing these interests against various occupations, myStrategic Compass creates a list of career profiles reflecting these personal values. Upon exploration, learners are able to identify the foundational skills required for desired opportunities.

With this powerful resource, educators, counselors, and workforce leaders can work together to personalize a plan for each learner's career interest, which is aligned to real opportunities and economic data. Learners can also utilize dynamic tools to budget their life using real-time market data based on their career interest, salary, region, and the local cost of living.
